

Unified Communications client training

Unified Communications from Spectrum Enterprise offers a multitude of benefits for organizations looking to increase collaboration and productivity. Our communications solutions offer diverse training options that enable clients to immediately reap benefits. Whether a client is looking to train new employees, conduct refresher programs, or review new features, we offer multiple options to fit the needs of both new and existing clients.

In order to get up to speed quickly, new clients receive (i) free custom webinar sessions (must be 15 or more lines and the number of sessions varies by size and complexity of the service), and (ii) day one support, a unique service, where we schedule a conference call to allow for rapid responses

to quick questions (for all client locations). All of this is scheduled by a Spectrum Enterprise project manager at a time that's most convenient for the client. In addition, we offer other training and support options to get clients the answers they need throughout the life of the service.

Overview

Training method	Fee	Description
Online Quick Start Guides and User Guides in PDF format	Included – no extra charge	Available 24/7/365
General Webinar	Included – no extra charge	Cover common areas of interest across users. Requires preregistration
