

# Does your city need to build its own fiber network?

All communities should be able to provide faster fiber connections to their business constituents — they just don't need to do it alone.

## 6 reasons to partner with an established fiber provider

You need		We provide
	<p><b>Broadband connectivity sooner rather than later</b></p>	<p>25 Mbps to 10 Gbps private, dedicated fiber service to a building within 30-120 days<sup>1</sup> on an existing nationwide fiber network.</p>
	<p><b>Expert resources to plan, build and maintain your network</b></p>	<p>More MEF-certified professionals than any other provider,<sup>2</sup> and more than 20 years of experience supporting large enterprises.</p>
	<p><b>A reliable, high-performing network you can count on</b></p>	<p>Service level agreements guaranteeing 99.99 percent network uptime, a four-hour mean time to restore (MTTR), not just respond, and a 24/7/365 network operating center, already existing today.</p>
	<p><b>A network that can grow with your city</b></p>	<p>We have invested over \$2 billion dollars and continue to invest in the superiority of our fiber network. We are adding, on average, more than 50 fiber-lit buildings to our network every day.</p>
	<p><b>Superior customer service</b></p>	<p>Local, dedicated government client account support, a client portal for increased visibility into your network, and a commitment to continuous improvement towards an effortless client experience.</p>
	<p><b>Lower costs</b></p>	<p>Competitive, flat-rate pricing and strategic consultative partnerships to build a customized fiber program that meets your needs.</p>

Take your city into the future and learn more about the advantages of partnering with an expert fiber provider.
