

Don't let your organization be vulnerable to cybercrime

2.6 billion+

data records were compromised in 2017, up 88%¹ from the previous year

These breach statistics² break down to:

7.1 million
records a day

300,000
records an hour

5,000
records a minute

Cybercrime cost facts:

\$6 trillion
amount cybercrime is expected to cost companies by 2021³

\$1 trillion
amount companies are expected to spend on cybersecurity by 2021⁴

All industries are vulnerable to data breaches:

Government

\$61.5 million
the cost to state and local governments after 6.3 million records were found to be put at risk⁵

Education

32 million
education records were compromised in the first half of 2017⁵

Healthcare

27.3 million
records were affected by data breaches in 2017⁶

Financial services

\$18 million
the average cost of cybercrime per firm, up 40% since 2014⁷

What can you do?

Leaving your network vulnerable to external threats can impact your bottom line. Even though 73 percent of IT professionals feel their organization has controls to prevent and detect an attack they still have to maintain a secure infrastructure with limited IT resources.⁸ Reduce the burden on your IT department by safeguarding your network—while also ensuring high performance and visibility—with a fully managed security solution designed to monitor and secure your network.

- Block suspicious activity and help secure your network connections
- Receive automatic updates to security patches and software
- Control employee access to unauthorized Internet sites
- Secure your data to remote workers using VPN connections
- Offload network support requirements to focus on more strategic initiatives
