

Easy access to cost-effective connectivity solutions with CALNET NextGen

Digital transformation and IT modernization are essential to creating a better citizen experience. Innovations and system efficiencies that can increase civic engagement and satisfaction require government agencies to have reliable, cost-effective, high-speed connectivity and a solid network foundation.

Procuring the essential network services and network solutions can be complex, especially for government agencies with limited IT resources. The California Network and Telecommunications (CALNET) contract is making it easier for state agencies to expand digital services and protect citizen data and government systems.

Issued by the California Department of Technology, the CALNET contract provides easy access to telecommunications and network services to more than 200 state and 2,100 non-state agencies. Agencies fill out just one form, simplifying the procurement process.

Cost-effective solutions available through CALNET

- **Category 22 - Cloud-Hosted VoIP Services:**

Empower your staff to securely communicate and collaborate across voice, messaging, file sharing and video conferencing with Unified Communications with RingCentral.

- **Category 24 - Internet Flat Rate Service (InFRa):**

Increase on-site municipal staff productivity and intra- and inter-agency collaboration with dedicated, symmetrical connectivity and speeds up to 100 Gbps.

- **Category 23 - Metropolitan Area Network Ethernet:**

Meet ever-growing data needs by connecting agency departments across a municipal campus or across town with a fast, reliable wide area network solution. Our high-performance fiber network accommodates large file transfers and public safety video feeds with speeds up to 100 Gbps.

- **Category 30 - Broadband with Internet Service:**

Support your advanced network needs and boost productivity with a broadband connection that offers flexible speeds, with up to 1 Gbps per second downloads, unlimited bandwidth usage and no throttling.

- **Cloud Services (CC-AWS-LA/CC-AWS-SJ or CC-AZU-LA/CC-AZU-SJ):**

Extend your network with fast, secure and dependable private cloud connections to cloud service providers.

- **Managed Router Service:**

Efficiently route traffic and improve bandwidth use without investing in hardware or day-to-day management.

- **DDoS Protection:**

Guard against malicious volumetric attacks designed to overload your network with world-class distributed denial of service (DDoS) threat identification and mitigation.
