

TV for hospitality

Spectrum Business® TV for hospitality has three service platforms to choose from — Moviebeam, Fiber Connect Plus and Set Back Box.

- **Moviebeam** paired with Fiber Connect Plus offers guests an integrated in-room TV service built to enhance guest satisfaction. It offers three package options – Lite, Basic or Premium and provides a range of services from a simplified streaming app solution to a fully immersive guest experience.
- **Fiber Connect Plus** delivers HDTV programming and your custom content to TVs throughout your property. It is ideal for video systems integration platforms like Moviebeam or as an economical standalone solution.
- **Set Back Box** provides your guests with a homelike viewing experience and includes an interactive guide, on-demand library, the ability to pause, rewind and fast forward live TV, digital signage, and custom content* and logo insertion.

Add on:

- **TV Streaming Access**, as an add-on to Fiber Connect Plus or Set Back Box, enables your guests to stream live TV and on-demand content on their personal devices anywhere on the property, via an app or browser. Features include an interactive guide with advanced search features and custom content insertion.

Key benefits of TV service from Spectrum Business:

- The delivery infrastructure for our TV services provides a private and dedicated fiber connection to your location, which paves the way for additional Spectrum Business services like internet, WiFi and Unified Communications.
- Our wide variety of programming bundles and packages are available on all platforms.
- TV services from Spectrum Business are not susceptible to weather-related disruptions.

To find the best solution for your location, consider the following:

- All programming bundles and packages are available on all TV services. See enterprise.spectrum.com/channels for options.
- If you want an immersive guest experience with advanced entertainment options, guest services and a branded welcome screen, Moviebeam has three feature packages and add-on services from which to choose.
- If you have or are planning to add video systems integration, Fiber Connect Plus (FCP) is ideal for use with these platforms. Check with the integrator to see if they prefer video delivered in QAM or IP format.
- If you want an interactive programming guide or on-demand programming content, Moviebeam, Set Back Box and TV Streaming Access provide these features.
- If you want any of the following features — the ability to pause, rewind and fast forward live TV, digital signage or your logo on the user interface — Set Back Box can deliver all of them.
- If you have custom programming content that you would like to have inserted into the channel lineup, Moviebeam with Fiber Connect Plus, Fiber Connect Plus, Set Back Box* and TV Streaming Access offer this capability.
- If you want programming content that can be viewed on mobile devices, tablets or computers, TV Streaming Access is the perfect choice.
- Every service has a unique set of features. The chart on page two provides a quick comparison of the four TV services.
- Every delivery option has a unique set of infrastructure requirements. The chart on page three provides a summary of these requirements.
