

Connected healthcare: an inside look at at a modern practice

Increase patient satisfaction and staff productivity with a complete range of connectivity solutions providing the bandwidth and flexibility needed to deliver more effective care in your practice.

Unified communications makes it easy for staff to stay connected seamlessly no matter where they are in the building.

Dedicated Fiber Internet allows clinicians to quickly and securely send large digital files and test results to specialists.

Managed cloud security protects access to sensitive patient health information and other data in the cloud and on your network.

Hosted Call Center enables medical schedulers to easily make appointments and handle patient inquiries.

Managed WiFi provides patients with seamless internet access, allowing them to use tablets at check-in to update their medical history, which can be uploaded to the electronic health record (EHR) platform.

Edge networking solutions simplify the deployment and management of your organization's network to securely support digital health and rapidly changing care delivery models.

- **Enterprise Network Edge**
- **Managed Network Edge**
 - **Smart spaces** easily transforms any medical place into a smart space through a single, intuitive, cloud-based portal that integrates MNE environmental sensors, smart cameras and wireless access points.
 - **Remote worker** provides your healthcare workers an in-office experience regardless of their location.

Ethernet Services allows clinicians to connect to a patient's full EHR across interoperable facilities.

Managed WiFi lets patients stay connected on their mobile devices, even in the exam room while waiting to see a doctor.

With **Cloud Connect**, doctors can access cloud-based EHRs over a reliable and secure connection.
