

Tech screening:

Check the IT symptoms that may be holding back your practice

If your IT infrastructure performance is a bit under the weather, your patients and profits can suffer. Give your practice's technology a physical by answering these screening questions:

1 Is your hardware more than five years old?

If you answered yes, it's time to...

Suture security and compliance gaps

79%

of healthcare leaders say data security and cybersecurity will be their number-one focus in the next 12 months.¹

We'll update your equipment when it's ready, automatically implement the latest patches to keep the network safe and keep your tech HIPAA-compatible.

2 Do your applications struggle to load?

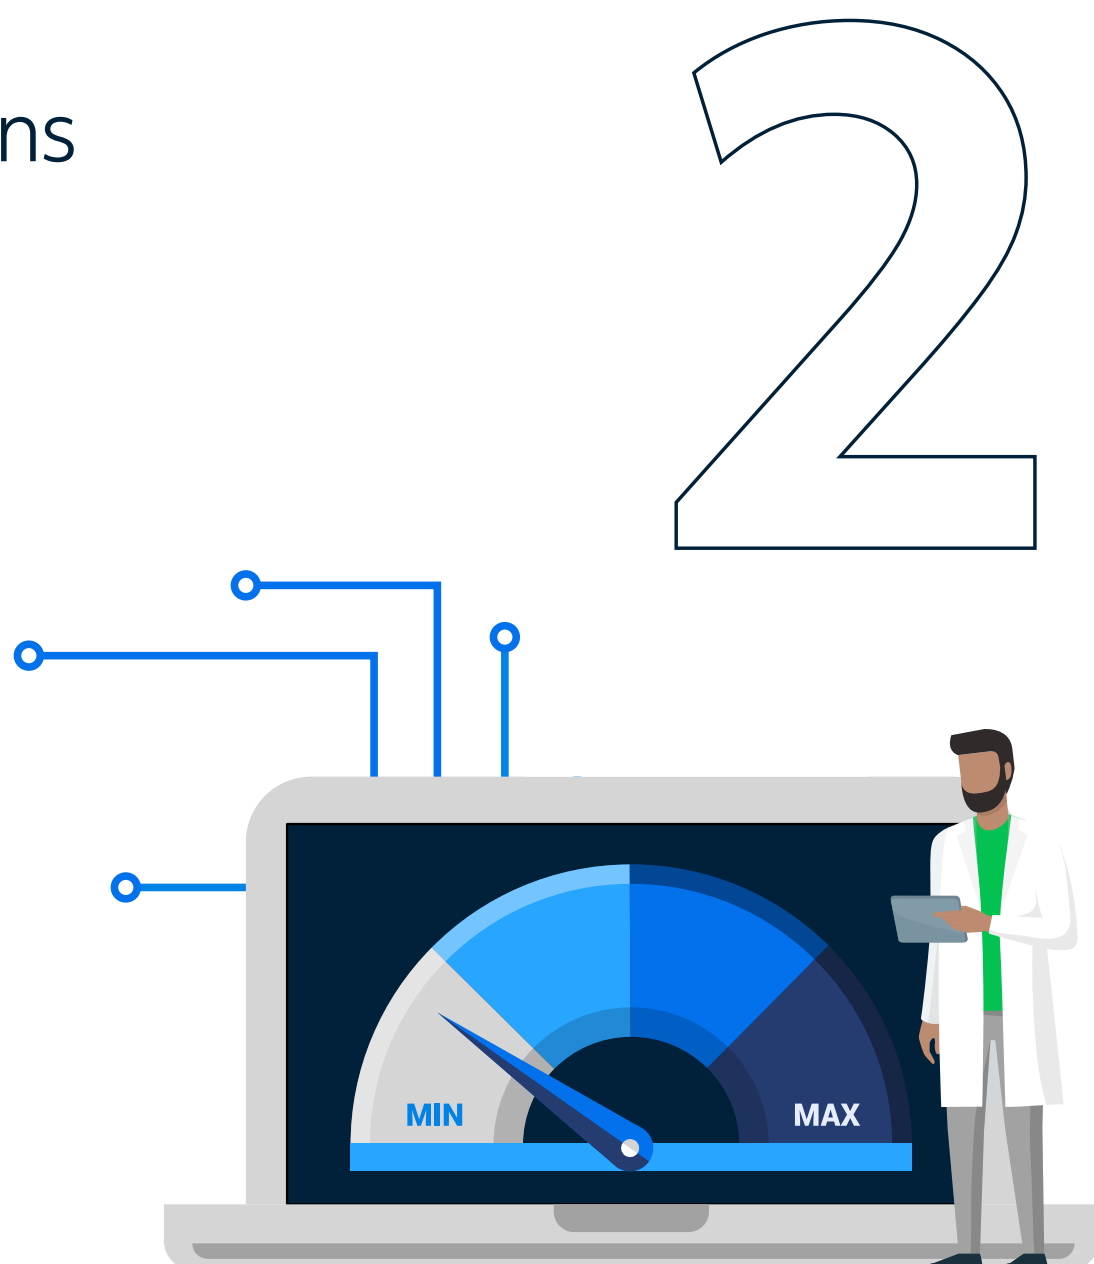

If you answered yes, it's time to...

Get a bandwidth injection

39%

of healthcare providers can't keep up with the pace of acceleration in digital healthcare technologies.²

To make sure your connectivity can pass the stress test, get the internet speed, reliability and efficiency your practice needs to securely access critical medical data in real time — both on-site and remotely.

3 Are you overpaying for subpar technology?

If you answered yes, it's time to...

Reduce your provider intake

62%

of healthcare organizations used piecemeal technology solutions during the pandemic, and now must adjust their overall strategic approach.³

Cut monthly costs and bring all your telehealth systems together in one cloud-based, unified platform. One bill, one provider, endless efficiencies for your practice.

Get a free IT assessment — no referral needed

Schedule a consultation with a Healthcare IT Specialist today to get the cure for what ails your practice.
