INFOGRAPHIC

It's time to prepare your IT infrastructure for the future

The top three tech initiatives identified by IT leaders — cybersecurity, cloud/cloud migration, digital transformation — all require highly reliable, high-performance network technologies.[1] To meet these challenges, many organizations are preparing to expand their capabilities in networking and connectivity.

$9.48 MILLION is the average cost of a data breach in the United States.[2]

71% of organizations note optimizing the existing use of cloud (cost savings) as a top initiative.[3]

58% of enterprises are revising how they split their budget between capex and opex due to the economic climate.[4]

To support today's technology trends efficiently, you need a network without limits and a partner that exceeds expectations. Spectrum Enterprise® has the infrastructure and expertise to meet even the biggest challenges in network modernization.

Enhance user experiences with ultra-high-speed connectivity up to 100 Gbps available nationwide.

Expand your capabilities with proven SD-WAN and security solutions enabled through our partnerships with world-renowned brands.

Grow your network confidently over our highly distributed fiber backbone with dense metro interconnectivity.

We put the needs of our clients first and are committed to ensuring an exceptional client experience with dedicated local account teams and technicians, 100%, 24/7/365 U.S.-based support and our industry-leading package of service-level agreements (SLAs), including an SLA that guarantees 100% uptime.*

Learn more

*100% uptime SLA guarantee applies only to Fiber Internet Access, Ethernet Services, Cloud Connect and Enterprise Trunking.
