

5 in-store benefits of smart tech in the retail space

Use smart tech to improve experiences and maximize value.

The right combination of smart technologies can make your retail space safer, smarter and more efficient.

ADD COMFORT CONTROL:

Control temperature, humidity and indoor air quality for customer comfort and safety.

ENHANCE CUSTOMER EXPERIENCES:

Use analytics to get insight into occupancy, wait times and staffing needs to enable higher quality experiences.

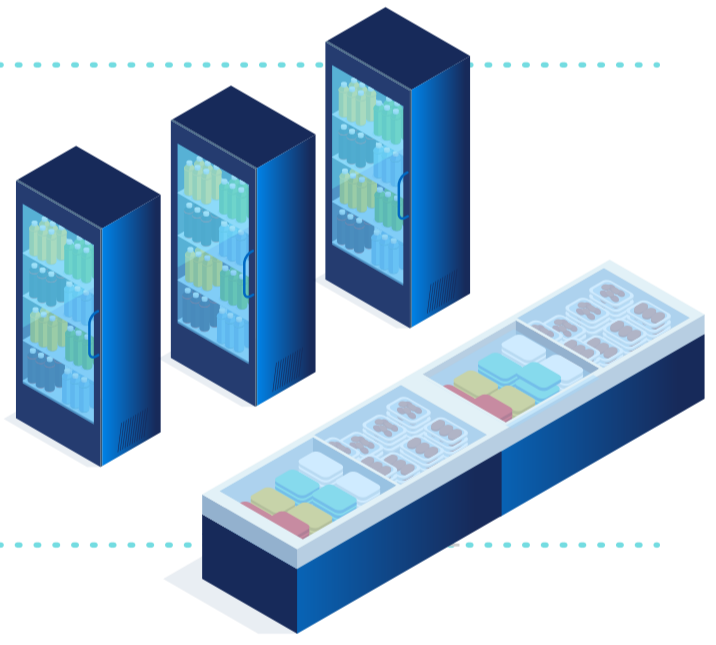

IMPLEMENT AUTOMATION:

Increase productivity and streamline workflows by automating processes.

REDUCE LOSS:

Monitor temperatures inside cold storage environments and detect leaks to safeguard inventory.

IMPROVE SAFETY:

Use open/close sensors to monitor and control access to spaces.

Smart retail made simple.

Spectrum Enterprise Smart Space solutions are designed to work together to help you minimize business disruptions, reduce unnecessary costs, maximize resources, manage accessibility and improve the experiences of employees and customers alike.

You can easily customize Smart Space solutions to help you understand and analyze your network and environmental data. By seamlessly integrating these technologies with our ecosystem of third-party applications and your retail space management system, you can turn raw data into intuitive information you need to take meaningful action.

Discover the benefits of Smart Spaces.
