Managed services for K-12 education

A cost-effective way for schools and districts to meet technology goals

54% of IT employers say skill shortages are impacting their operations.[1] They are challenged to keep up with technology shifts.

Partnering with an education network services expert can help

By 2025, managed services spending will grow **48%**.[2]

The advantages of managed services

Smarter spending

83% of organizations that shifted to managed services report cost savings greater than 25 percent.[3]

Control costs

- No upfront hardware ownership costs.
- Leverage the IT expertise of a third-party provider without adding to your staff.
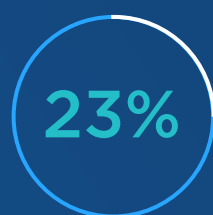

Security management

348 publicly-disclosed K-12 cybersecurity incidents in 2019. This is nearly three times as many disclosed in the prior year.[4]

Reduce risk

- Network performance and security issues are addressed before they impact your school or district.
- 24/7/365 monitoring with dedicated, expert technicians on call so your IT staff doesn't need to be.

Enhanced productivity

23% of K-12 school districts rate themselves as reactive or very reactive when it comes to maintaining their network security.[5]

Prevent downtime

- Staff time is redirected to strategic priorities rather than day-to-day troubleshooting.
- Ensure uninterrupted service with a network that is always monitored and managed.

Spectrum Enterprise offers a suite of managed services

Managed WiFi

Managed Security Service

DDoS Protection

Managed SD-WAN

Managed Network Edge

Managed Router Service

Unified Communications

Spectrum Enterprise managed services can help you increase your network productivity while you focus on strategic initiatives like enhancing student outcomes.
