# Managed Network Edge and UC with RingCentral

Empower collaboration with networking and voice solutions from a single provider

Collaborating with customers and co-workers has never been easier. Delivered over the Cisco Meraki platform, Spectrum Business® offers the modular, all-in-one platform of Managed Network Edge along with our Unified Communications (UC) with RingCentral service to bring you simplified and easy-to-use solutions to handle your voice, collaboration, video conferencing and data needs. Also available as part of the Spectrum Business Managed Workplace Package, these services work seamlessly together for a truly cohesive experience. This experience is enhanced by our centralized, cloud-based portals that give you visibility and control to ensure network and UC performance.

A better way to collaborate

UC with RingCentral is a cloud-based service that integrates with our Managed Network Edge solution to provide you exceptional reliability and comprehensive visibility into your operation. By combining Managed Network Edge and UC with RingCentral, your entire organization benefits from a better collaboration experience and productivity-boosting features customized to fit your needs.

Gain peace of mind with advanced security

Strengthen your security posture with end-to-end data encryption, automated updates, advanced firewall, malware and intrusion protection.[1] The most popular option is to purchase UC with Managed Network Edge along with Dedicated Fiber Internet service, which includes a 100% uptime service-level agreement (SLA).[2]

Design, implement and manage easily with a single partner

Managed Network Edge and UC with RingCentral, along with our nationwide reach and multiple connectivity options, make Spectrum Business uniquely qualified to be your single networking partner. We'll tailor a complete solution to meet your needs using a consultative approach to design and implementation. After installation, you'll experience comprehensive support through our simplified billing and fast resolutions. We supply the hardware, updates and day-to-day management of the Managed Network Edge and UC with RingCentral solution so your team can focus on other business priorities.
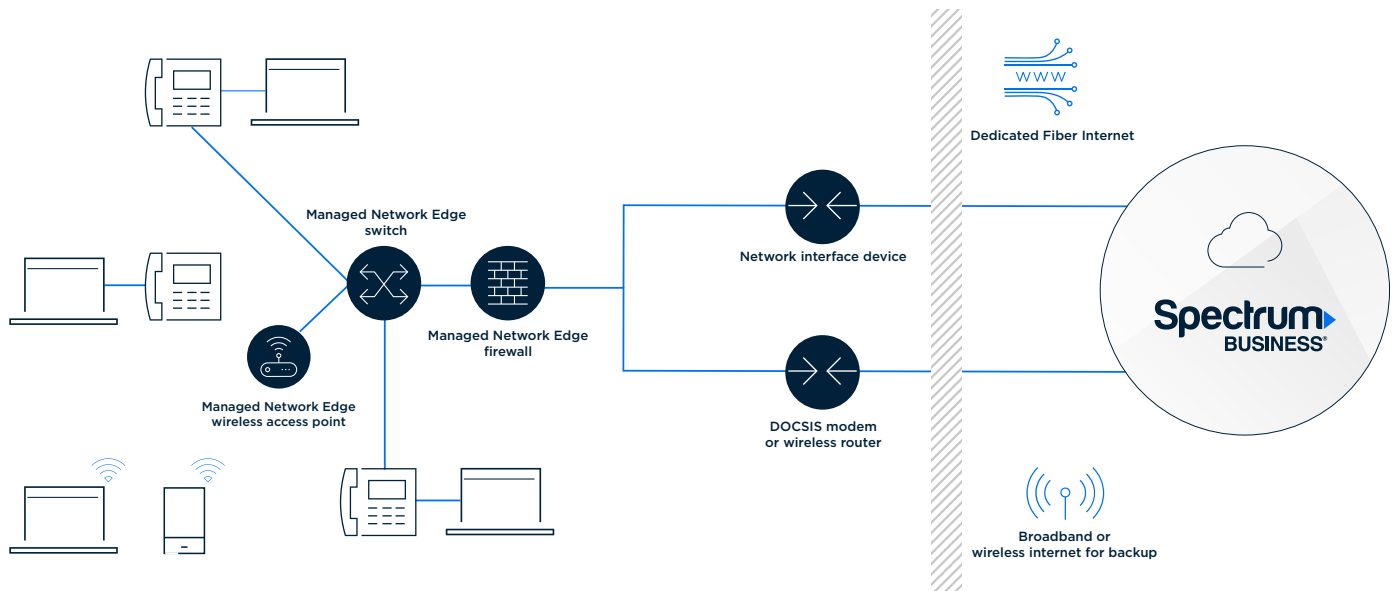

Product highlights

- **Your unified communications and collaboration simplified and in one place:** The UC with RingCentral service is also offered with the Managed Workplace Package, a fully managed solution including connectivity, communications, collaboration, equipment and management for maximum user experience and engagement.

- **An intuitive, cloud-based phone system:** Implement a customizable and easy-to-use, cloud-based phone system and quickly start taking video and phone calls on any device.

- **Add layers of security:** Manage Network Edge incorporates firewalls and unified threat management (UTM) with our provider-managed, integrated security.

- **Seamless experiences across the desktop, tablet and smartphone:** Mobile device integration includes seamless call shifting between the desktop or desk phone to a mobile device while users are mid-call.

- **No more hardware to manage:** Free up IT resources and budget while eliminating the need to maintain telecommunications equipment across your organization.

- **Partner with trusted professionals:** Leverage a consultative approach as our experts design and implement your voice and networking solutions based on your precise needs for services that are backed by our 100%, 24/7/365 U.S.-based support as part of the Managed Network Edge platform.

1. Cloud-based portal, advanced firewall, malware and intrusion protection are available with purchase of Managed Network Edge solution.
2. 100% service availability SLA applies only to Dedicated Fiber Internet.
