Wireless Internet for healthcare

Connect your healthcare organization to the internet with a simple, all-inclusive wireless solution

Most healthcare organizations (HCOs) today depend on internet connectivity to conduct business. As organizations add locations, onboard applications and share electronic health records (EHRs) to meet business requirements, they need reliable internet connectivity. Wireless Internet enables you to be connected whether you need to rapidly connect to an internet service, implement temporary internet access or deploy redundant internet connections. With Spectrum Business® you can enjoy the benefits of a single provider with a comprehensive internet access portfolio for all your connectivity needs.

Wireless Internet is a nationwide, all-inclusive wireless internet service that comprises a data plan, wireless device, installation and support. Connect to the internet or support telehealth goals with a simple, diverse and all-inclusive wireless access solution using a strong cellular signal at each location.

Product highlights

- **Internet access:** Access high-speed internet nationwide with broad coverage and a strong cellular signal at each location.
- **Business continuity:** Gain peace of mind knowing that your HCO can continue to operate through a wireline interruption.
- **Rapid installation:** Quickly deploy internet access to any location.
- **Comprehensive solution:** Receive professional installation, configuration, activation and ongoing 100%, 24/7/365 U.S.-based support.
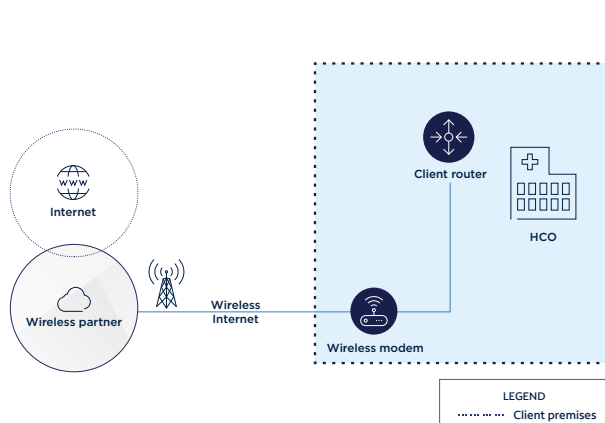

Key features

- Multiple 5G and 4G LTE device and data plan choices ensure an ideal solution is tailored to each location.
- Client-managed internet failover and failback capabilities.
- Single provider for all your connectivity and networking needs.
- Get a strong signal from one of our cellular network partners.
- Routes internet traffic separately from wireline connections.

Wireless Internet options for healthcare deployment

Service can be designed for temporary internet or as a secondary access option.

Temporary internet

Available services

- **Dedicated Fiber Internet:** Offers dedicated, high-speed, scalable, nationwide internet connectivity, with symmetrical upload and download speeds and bandwidth up to 100 Gbps. The service is backed by a 100% uptime service-level agreement (SLA) all the way to the handoff point at your location.

- **Secure Dedicated Fiber Internet:** Connect with confidence when you integrate fast, dependable, dedicated fiber internet service with enterprise-level cybersecurity protection in one affordable and remarkably simple solution. The service is backed by a 100% uptime SLA all the way to the handoff point at your location.

- **Enterprise Internet:** Gain fast, reliable and cost-effective access to the internet or cloud-based applications with an enterprise-grade experience. Available in a range of speeds up to 1 Gbps, the solution provides peace of mind with an SLA that includes 99.9% uptime and a rapid restoration commitment all the way to the handoff point at your location.

- **Managed Network Edge:** Delivered over the Cisco Meraki platform, this fully managed, modular service offers security features, routing, SD-WAN, WiFi, switching, smart cameras, environmental sensors and the ability to work from anywhere there is an internet connection.

- **Enterprise Network Edge:** Improve the network experience for your staff and patients with an enterprise-grade managed solution that brings together connectivity, equipment and network management to support hybrid networks and workforces. Powered by Fortinet, the solution simplifies IT operations by providing networking with security features and optional integrated WiFi and switching in a multi-cloud-ready platform.
