# Managing your local government network just got a lot easier

- One integrated platform for secure connectivity, communications and equipment.
- Immediately increase technology expertise and support available to your organization.
- Gain efficiencies with a single point of contact for installation, billing support and equipment maintenance.
- Choose what works best for you with a range of options — from co-managed to a fully managed solution.
- Eliminate upfront capital costs and save operating expenses by including network hardware, maintenance and repairs for one, predictable and transparent monthly cost.

TAILORED SOLUTION. INTEGRATED PLATFORM. DEDICATED PARTNER.

100% uptime SLA[1]
Services backed by a service-level agreement (SLA) that offers 100% uptime all the way to the hand-off point at your location.

Advanced security
Mitigate risks with an integrated and auto-updating security solution managed by our network experts.

WiFi
Provide staff and visitors secure and simple access to your network for better experiences.

Switch
Reduce complexity by connecting your existing office infrastructure.

Management portal
Gain efficiencies by analyzing data to better manage network performance.

Unified communications
Seamlessly communicate and collaborate with calling, videoconferencing, messaging and more in a single application.

SD-WAN
Quickly and easily scale your network while improving application performance with intelligent routing capabilities.

Dedicated internet
Improve productivity with fast and consistent connectivity to the internet, data centers and cloud providers.
